AARYA MANANDHAR

Kuleswor-14, Kathmandu, Nepal

career@aaryamanandhar.com.np | (+977) 9818879857 | github.com/Aarya-Manandhar

Career Objective

Dedicated final-year BSc. CSIT student with a strong track record of developing web, desktop, and secure applications. Passionate about continuous learning and maintainable code. Seeking a final-year internship or entry-level developer role to apply my problem-solving skills and technical versatility to real-world business challenges.

Education

Bachelor of Science in Computer Science and Information Technology (BSc. CSIT)| 2022-2026 (Expected)

NCCS College,Tribhuvan University, Kathmandu

Technical Skills

- **Programming Languages:** • Python • Java • PHP • JavaScript • SQL • C • C++
- **Web Development:** • HTML • CSS • AJAX
- **Databases:** • MySQL
- **Tools:** Git • GitHub • VS Code • IntelliJ IDEA • Visual Studio • Postman • Playwright • Figma • XAMPP

Projects

DeadMan's Switch | *Technologies: Solidity, JavaScript (React JSX,) HTML, JSON* | github.com/Dead Man's Switch

- Developed a cryptographic "dead man's switch" application designed to securely encrypt data and automatically manage its release based on predefined user-activity triggers.
- Implementing secure encryption algorithms to ensure data integrity and privacy.

Baa ko Achar (E-commerce Platform) | *Technologies: PHP, JavaScript, HTML, CSS, MySQL* github.com/Baa Ko Achar*:*

- Built dynamic front-end interfaces and implemented back-end server logic using PHP to handle product displays, user sessions, and order management.

Smart Tender (Bidding Platform) | *Technologies: Java, Java Swing* | github.com/Smart Tender

- Built a desktop-based tender bidding application to facilitate and manage the bidding process.
- Designed and integrated an intuitive Graphical User Interface (GUI) utilizing Java Swing for seamless user interaction and data entry.

Sajilo Gig (Hackathon Project) | *Technologies: PHP, Web Technologies* github.com/SajiloGiG

- Collaborated under tight deadlines in a hackathon environment to prototype a gig economy platform connecting users with short-term jobs.

SuiteCRM QA Automation | Technologies: JavaScript, Playwright, Node.js, GitHub Actions | github.com/QA

- Developed an end-to-end test automation framework for **SuiteCRM** (a CRM web application) using the **Page Object Model (POM)** design pattern to ensure modularity and reusability across test suites.
- Automated **18+ test cases** across Authentication, Accounts, Contacts, and Leads modules covering CRUD operations, input validation, session security, and unauthorized access prevention.

SpecSense AI | Technologies: Python (FastAPI), React (JSX), scikit-learn, spaCy, TailwindCSS, Vite | github.com/SpecSense-AI

- Developed an AI-driven requirement quality intelligence platform that automatically parses PRD/specification documents to detect ambiguities, weak phrasing, and untestable clauses.
- Implemented a hybrid multi-label classification pipeline combining TF-IDF, Logistic Regression, and rule-based heuristics to provide automated requirement rewrites and quantitative quality scoring.
